

Students from The Study support the Women's Y Residence

Montreal, January 7, 2009. The Women's Y Foundation is pleased to announce that senior school students from The Study have chosen to support the Women's Y (YWCA Montreal) Residence.

Every year, senior school students organize fundraising activities to the benefit of non-profit organizations. Those actions aim at making the students active members of the community and citizens of the world. It is with great emotion that Ms. Diana Pizzuti, Head of Housing Services of the Women's Y of Montreal, received the donation from the students during an assembly held at The Study on December 5, 2008.

Founded in Montreal in 1915, The Study is a dynamic and outward looking private school committed to helping each girl achieve her full potential. The Study offers high quality training for elementary and senior school girls. Strong links were established between the Women's Y and The Study since 2003, when its director at the time, Ms. Mary Liistro Hebert, was named finalist of the YWCA Women of Distinction Gala, in the Education category.

The Women's Y Residence welcomes women experiencing a difficult period in their lives and who wish to participate in a program of social reintegration. This program offers community living in a secure environment, at an affordable cost. A team of committed counsellors accompanies each woman as she follows a personal development plan adapted to her individual needs.
